

In addition to the regular Microsoft applications of a laptop, the Dell Latitude E5500 supplied by the Trust is to be used for:

- Gel documentation with the Canon camera and EzCap USB Video (and Image) Grabber.

For labs supplied with the 'KT Pathology Kit' the laptop is also required for:

- the LT-4000 Microplate Reader and;
- Image capture with the SP-200 compound microscope or BMS stereo microscope, Nikon P6000 camera and EzCAP USB Video Grabber.
