

The Trust has provided a set of reference texts and for those laboratories with students, two copies of each book have been supplied.

The Principal Investigator should keep the books in a safe place, preferably in their office, and allow them to be readily available for use.

### 1. Plant Breeding and Molecular Biology Books

- **Principles of Plant Breeding** (1999), RW Allard, 2<sup>nd</sup> edn, Wiley & Sons, UK
- **Plant Breeding, Theory and Practice** (2006), NC Stoskopf, 2<sup>nd</sup> edn, Scientific Publishers, India
- **Molecular Markers in Plant Genetics and Biotechnology** (2003), Dominique de Vienne, Science Publishers Inc, USA

### 2. Plant Pathology Book

For laboratories supplied with the 'KT Pathology kit' an additional reference text supplied is:

- **Basic Plant Pathology Methods** (1995), OD Dhingra & JB Sinclair, 2<sup>nd</sup> edn, CRC Lewis Publishers, USA
