

Protocols

	<i>Page</i>
Horizontal polyacrylamide gel electrophoresis (hPAGE)	1-5
Electrode repair for Cleaver Scientific horizontal gel units	6
Agarose gel electrophoresis	7-8
Gel photography with Canon camera	9
Ethidium bromide disposal and information notes	10
Ethidium bromide disposal using a de-staining bag	11
Assembling and use of the KT Inverter/Battery back-up	12-16
Use of GE Whatman FTA PlantSaver cards	17-18
GE Whatman FTA card protocols	19-22
DNA extraction—CTAB protocol	23-24
Reconstitution of Primers	25
PCR protocol	26
DNA concentration approximation by an 'in-gel' method	27-28
DNA ladders and loading dye	29
Buffers and solutions / recipes	30
Pathology media recipes	31
Standard units, pre-fixes and usage	32
Alcohol burner and benchtop cooler	33

Equipment: Instructions & Care

	<i>Page</i>
Autoclave—Dixon's 15 Litre	34
Balance	35
Centrifuge	36
Counting chamber—Neubauer	37-38
Desiccator	39
Dry block heater	40
Microscope—compound	41-43
Microscope—stereo	44-46
Microscope camera—Moticam	47-49
pH meter	50
Pipettes	51
Dust Hood	52-53
